

### Practical Assistance for Obtaining Surety Bonds

The Surety and Fidelity Association of America (SFAA) and the National Association of Surety Bond Producers (NASBP) created a FREE program to help new and emerging construction businesses, particularly minority-owned and other under-represented businesses, learn how to qualify for surety bonds.

- Ten on-demand modules.
- Flexible and self-paced learning: Take and complete anywhere, anytime.
- Videos, interactive activities, and knowledge check questions.
- Downloadable checklists and valuable reference documents.

This program can help you determine if construction surety bonds are for you, and if so, how to prepare your company to qualify. If you've already qualified for surety bonds, it can also provide valuable information on how to establish or grow your surety bond program and in turn, grow your business.
